WHAT THIS LIST IS

A bond is an IOU: governments and companies borrow from investors and pay back with interest. The venues where those IOUs are issued, listed, and traded — from the U.S. Treasury market, the deepest pool of money on earth, to a retail bond board in Warsaw — are the bond markets. They set the price of borrowing for every mortgage, corporate loan, and national deficit. That is why they command the respect James Carville once gave them: "I used to think that if there was reincarnation, I wanted to come back as the president or the pope or as a .400 baseball hitter. But now I would like to come back as the bond market. You can intimidate everybody."

This list covers 59 significant bond markets and fixed-income trading venues across North America, Europe, Asia-Pacific, the Middle East, Latin America, and Africa — sovereign and corporate bond markets plus the major electronic trading platforms, grouped by region. Every entry gives the venue's official trading-segment names, the operator and its leadership (full C-suite where published), how leaders are selected, how trading works and who may trade, what is traded with scale figures where published, official contact details, and the operator's annual-report cadence. "UNVERIFIED" marks what could not be confirmed — never guessed.
